Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 March 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a method for producing a protein, a glycosyltransferase, comprising the steps of introducing into a host cell a recombinant vector comprising a fusion gene containing a gene encoding a protein constituting a virus particle and a gene encoding the desired protein, the glycosyltransferase, and expressing said fusion gene in the host cell to produce the fusion protein and recovering said virus particle fused to said desired protein, classified in class 435, subclass 69.1.
- II. Claims 9-15, drawn to a method of producing a protein comprising the steps of transforming a host cell producing virus particles with a recombinant vector expressing a fusion gene comprising a gene encoding a protein having an odd number of membrane-spanning segments and a gene encoding the desired protein, expressing said fusion gene in the host cell and isolating the fusion protein and the desired protein, classified in class 435, subclass 69.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are patentably distinct from each other. The method of making a protein in group I and the method of making protein of group II are unrelated as they comprise distinct steps, and utilize different products and produce different results. It is noted that while the method of group I does not involve the use of a host cell producing virus particles, and does not involve a fusion protein to have a plurality of membrane spanning domains, the method of

Art Unit: 1652

group II involves the use of a host cell that is actively producing virus particles and the fusion protein comprises an odd number of membrane spanning domains. Therefore, the starting materials for the two methods are different and the end result is also different. The groups have acquired separate status in the art and separate fields of search.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manjunath N. Rao, Ph.D. whose telephone number is 703-306-5681. The examiner can normally be reached on 7.30 a.m. to 4.00 p.m..
